(54) Title: **SYSTEM AND METHOD FOR REMOTE RECORDING**

(57) Abstract: The invention relates to a system and method for remote recording of content currently being reproduced on a content reproduction device (1). The content reproduction device (1) is capable of reproducing received content, has means for user input of a command to record the content currently being reproduced, is capable of determining a content attribute comprising at least one of: a content identifier identifying the content and a content channel identifier identifying a content channel on which the content is being transmitted, and is capable of transmitting a recording instruction comprising the content attribute to a remotely located recording device (3). The remotely located recording device is capable of receiving said recording instruction from said content reproduction device (1), identifying a transmission channel based on said content attribute, and recording said content received on said transmission channel.
